

# Manufacturers of Rotogravure Cylinders

## Building a Promising Tomorrow: Fostering Growth on the Solid Foundation of our Expertise and Dedication

Kreativ Gravures, with a future built on the bedrock of a solid foundation, stands as a shining example of excellence in the gravure industry. With years of expertise and unwavering dedication, Kreativ has earned its reputation as a trusted partner for high-quality gravure solutions. Their commitment to innovation and customer satisfaction has propelled them forward as a leader in the field.

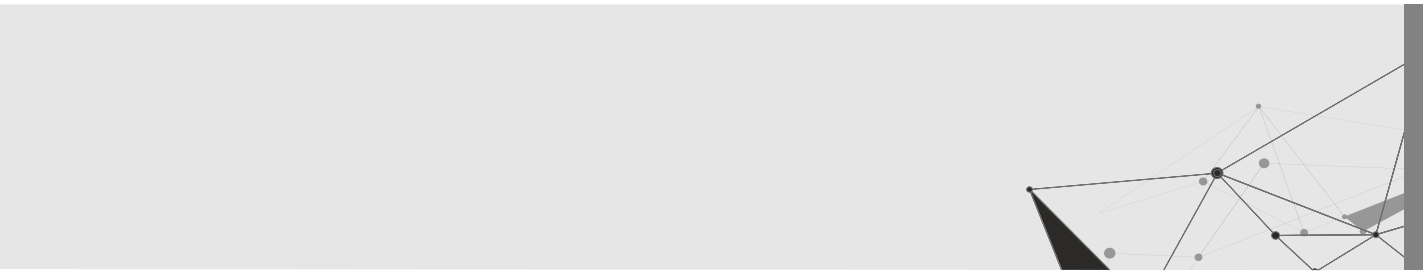

Drawing from a strong foundation of knowledge and experience, Kreativ Gravures continually pushes boundaries to meet the evolving needs of clients. They embrace cutting-edge technologies, ensuring the delivery of superior gravure printing cylinders that surpass expectations. With a focus on precision and craftsmanship, Kreativ is well-equipped to navigate the challenges of the future, paving the way for continued success and growth.

Kreativ Gravures truly embodies the spirit of a future built on a solid foundation, providing innovative solutions that leave a lasting impression in the world of gravure printing.

Kreativ Gravures truly embodies the spirit of a future built on a solid foundation, providing innovative solutions that leave a lasting impression in the world of gravure printing. clients to understand their needs and provide them with tailored solutions that meet their unique requirements. We are committed to building long-term relationships with our clients and being a trusted partner in their success.

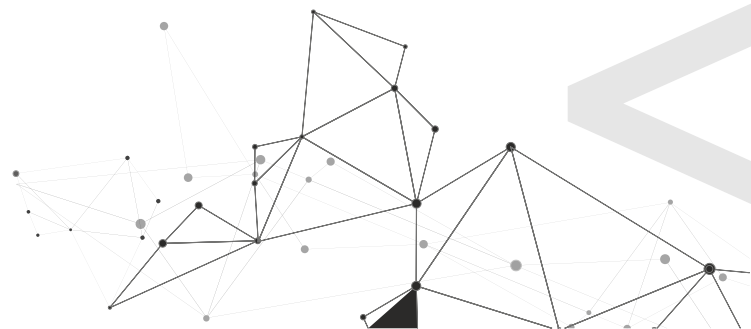

Choose Kreativ Gravures for your next rotogravure printing project and experience the difference that quality, precision, and commitment can make.

## ABOUT THE COMPANY

# Look no further

Kreativ Gravures is a leading manufacturer of high-quality electromechanically engraved cylinders for rotogravure printing. Since our establishment in 2016, we have been committed to delivering exceptional products and services to our clients.

At Kreativ Gravures, we specialize in the production of cylinders that meet the exacting demands of the printing industry. Our state-of-the-art equipment and experienced team enable us to produce cylinders with outstanding precision, durability, and consistency. We use the latest technology and techniques to create designs that meet our clients' specific requirements and exceed their expectations.

We take pride in our commitment to customer satisfaction, and we are dedicated to delivering on our promises. Our team works closely with our clients to understand their needs and provide them with tailored solutions that meet their unique requirements. We are committed to building long-term relationships with our clients and being a trusted partner in their success.

## Milestones

Company Incorporated  
in 2016 and  
headquarters in  
Ahmedabad.

A Humble Beginning.  
Plant Setup with Pre-  
press & 2 Engraving  
machines. Ahmedabad.

in-house fabrication,  
Plating Machines,  
Polish Master and  
Proofing Machine.

Increasing the  
portfolio by supplying  
shafted cylinders for  
wider usage.

Exports to nearly 20 countries such as Kuwait, Russia, Europe, Lebanon, USA, Canada, Nigeria, Indonesia, Africa, Bangladesh & Nepal.

# Commitment makes us different

Being backed up by capable machines and supported by the latest technologies, our company is distinguished by the finest talents. Our corporate culture, which promotes innovation and is centered around customized solutions, contributes to our uniqueness in the industry.

## What makes us different?

Cost Effective Solutions

Finest Product Quality

Customized Products

Wide Product Portfolio

On-demand On-field Support

Environment friendly Practices

## Electromechanically Engraved Cylinders

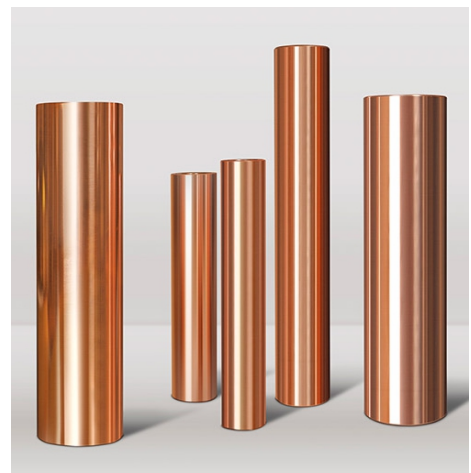

Adopting futuristic technology that redefines industry benchmarks is our way of engraving our niche. Kreativ Gravures is pioneering a paradigm shift with its advanced state-of-the-art engraving technology, that ensures enhanced sharpness, exceptional contrast and near-laser quality output, suitable for all kind of Printing, Coating, Security and other Specialty applications.

Our specialised electromechanical engraving process is a result of Hi-end and the Latest infrastructure, perfectly blended with our decades of industry experience.

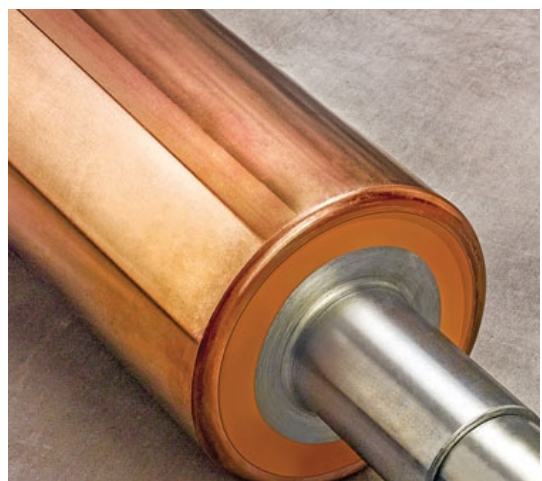

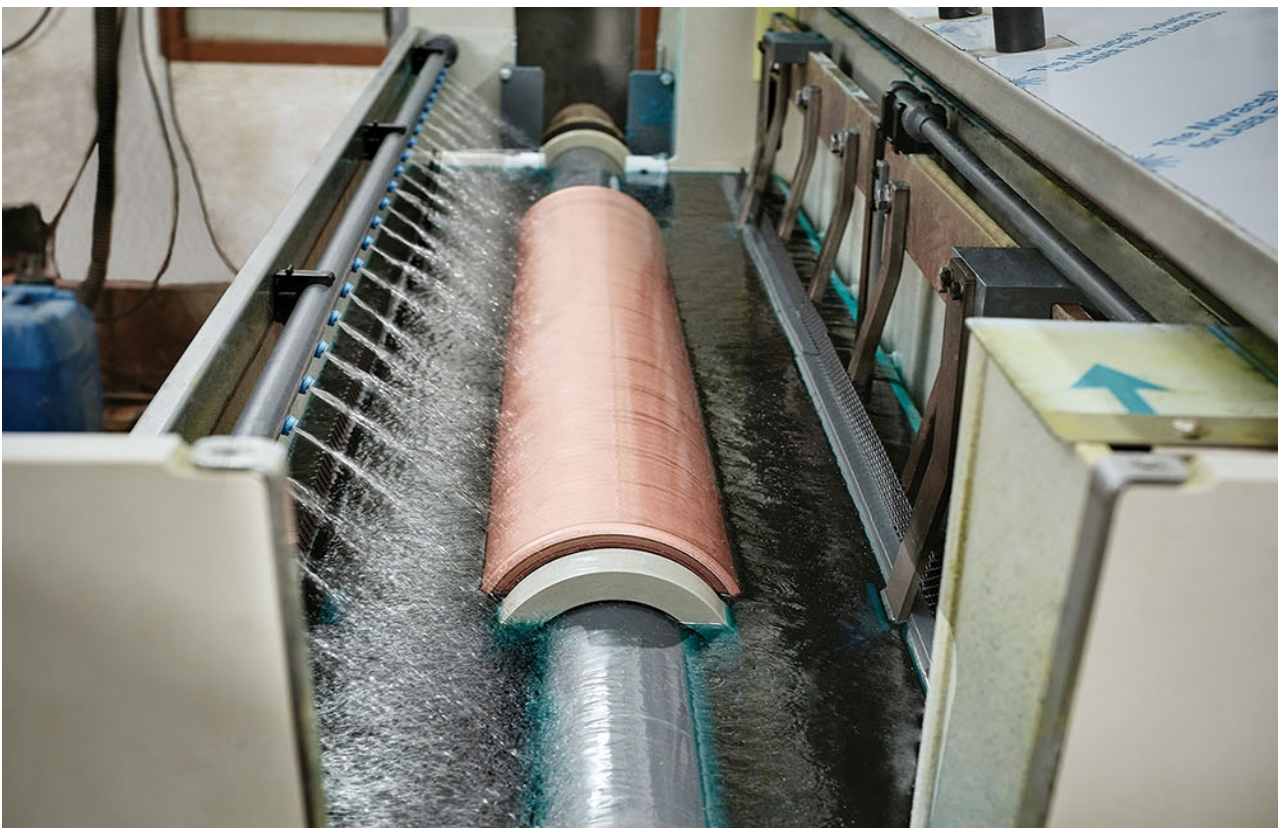

## Ready-to-Engrave Polished Copper-plated Cylinders

Utilizing cutting-edge technology, our state-of-the-art Polishmaster and CFM guarantee unparalleled accuracy. These advanced systems excel at creating flawless copper surfaces and achieving precise cylinder geometry, ensuring optimal quality and dimensional accuracy as per your requirements.

## Copper-plated Cylinders

We recognize that the uniformity and ductility of the copper layer, along with a fine crystal structure, are crucial factors for attaining optimum quality. Leveraging our state-of-the-art machinery and utilizing cutting-edge quality control devices, we have the capability to achieve and maintain the desired accuracy, guaranteeing exceptional end products that meet the highest industry standards.

KRENTIV

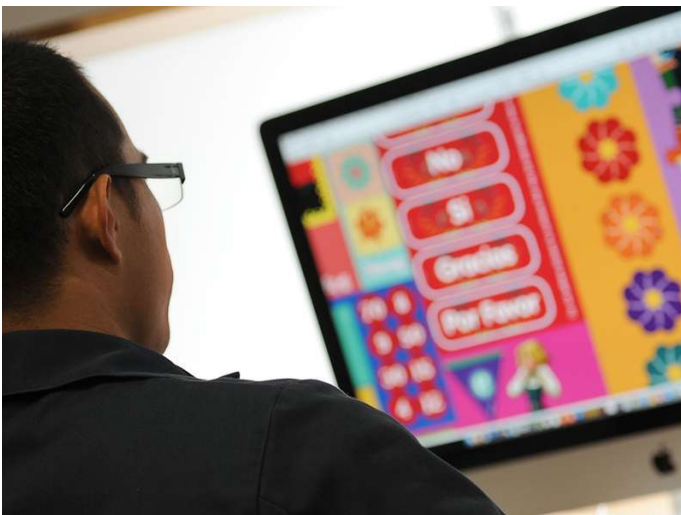

## Steel-Base Cylinders

Our rollers are the wheels of our revolution. Their superlative quality represents the progressive change we are striving towards. And for us quality begins at the core...  
Our cold drawn carbon-steel seamless pipes of optimum wall-thickness impart sufficient weight to the cylinders. Super Finished Bore, ensuring 90% Perfect Surface contact between the cylinder and cone - Ideal for Latest ELS Gravure Presses.

## Pre-Press Services

Proof of precision and assurance of optimal quality is of utmost importance to us. And we have the technology as well as expertise to ensure that. We can carry-out the Finger-printing of the Customer-press & based on these parameters, with the help of our state-of-the-art color-management set-up. We can even remotely provide graphics files, which will generate the first time right results at the Customer-End. This gives us a scope to make finer adjustments to achieve the flawless precision that we promise.

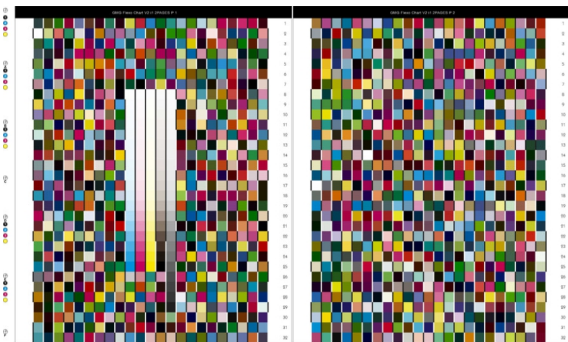

# Color Management

We are well aware of the accuracy and repeatability demands from the leading converters and brand-owners in our industry and hence, we have adapted a fully colour-managed work-flow from the day go.

We work with the GMG, Epson Printer, Xrite measurement device and Eizo monitor to generate the in-house Profiles and to fingerprint the customer presses. Our proof-control software enables us to certify the prints and hence, assure the consistency to the customers.

## Ready For the Future.

Our best-in-class infrastructure consists of a huge Ready Inventory of Raw Material (Seamless Pipes and Steel Plates), A fully-equipped Steel-base manufacturing facility including

- Two high-end electronic engravers, Ohio Spectrums, with hybrid capabilities. Comprehensive range of high-end accessories and software.
- Polishing facility featuring the Polishmaster machine with all quality equipment.
- CNC Machining Centres.
- Galvano line - 7 plating tanks.
- Gravure Proof Press for precise proofing.
- Dynamic Balancing Machines for achieving optimal balance in cylinders.
- Cylindrical Grinding Machines for achieving higher surface finishes.
- Prepress Services to streamline workflow processes.
- Color-calibrated Monitors, GMG software, Epson Proofer, and Proof-Control Software for achieving a complete and accurate color-managed workflow.

**We provide cylinders in a wide range of sizes,** starting from as small as **400mm (C) x 400mm (L)**, all the way up to one of the largest sizes in the industry, measuring **1150mm (C) x 1350mm (L)**

## Catering to every need

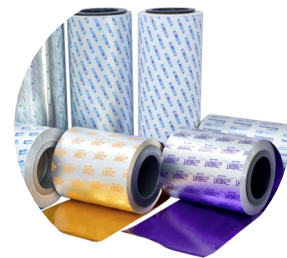

As a leading roto-gravure cylinder manufacturing company, we cater to a wide range of industries with our high-quality products. Our cylinders find applications in circuit board printing, plastic printing, paper printing, foil printing, textile printing, and sun mica printing. We understand the unique requirements of each industry and offer tailored solutions to ensure optimal performance and superior results. Our cylinders are designed to deliver exceptional quality and reliability. We take pride in serving these industries by providing the necessary tools for their printing needs.

**CIRCUIT BOARD  
PRINTING**

And many more.

**Our revolutionary methods, surpassing industry standards,** have led to the development of specialized techniques. These techniques enhance the quality and performance of our rotogravure cylinders, resulting in **superior outcomes, optimal ink usage, and extended lifespan.**

KRENTIV

## Why Choose us?

Key differentiators include:

Continuously widening product range and improvements in product features

Customised solutions to solve toughest problems

Expert technical advise at your doorstep

Centre of excellence to continuously raise operational performance.

Commitment & passion for exceptional customer service

Intense focus on operations and consistency in product quality

Highest integrity and commitment to compliances

CREATIVITY

## Caring for the future.

Our Business has pledged to promote green initiatives and some of them include:

### **Development of cylinders with optimum ink usage.**

Eco-friendly product lines.

### **Control air, ground and water pollution**

Preventing release of pollutants in the air through engineering controls.

### **Water conservation**

Water consumption closely monitored which has resulted in substantial reduction in water consumption.

### **ETP (Effluent Treatment Plant) & STP (Sewage Treatment Plant)**

Monitored by trained professionals along with regular 3<sup>rd</sup> party inspections.

### **Reduction of hazardous waste generation**

Committed to be well below the statutory norms of waste generation.

### **Energy conservation**

Extensive measures to conserve power across all operations.
